Collections classified by knowledge area

Evolução do Número de Acessos ao Portal (2001-2012/5)

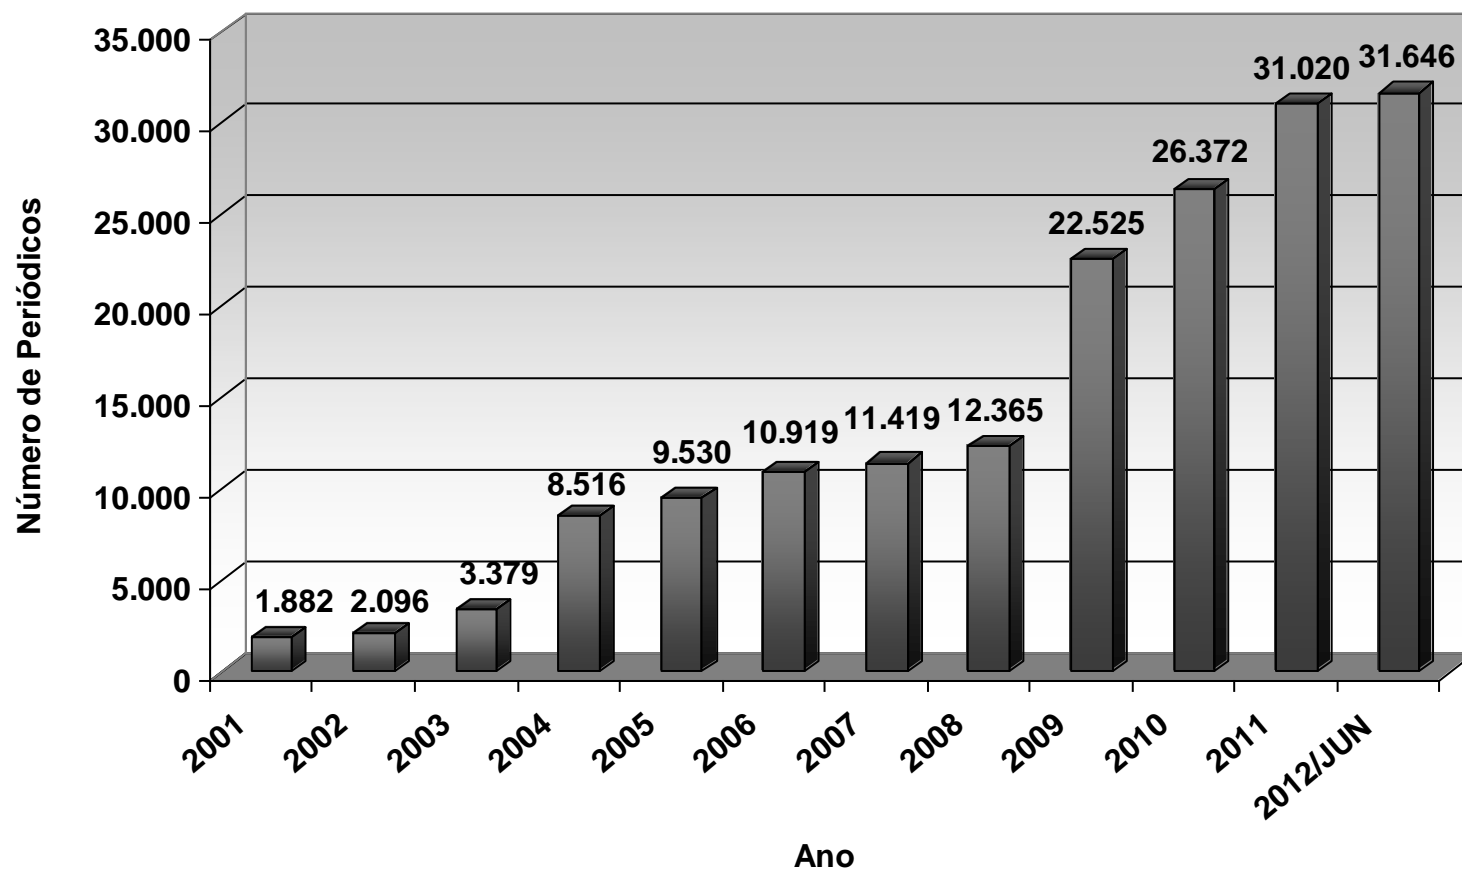

Portal de Periódicos

Such number corresponds to the almost totality of post graduation programs in Brazil

Number of e-journals available 2001-2012

*Brazil Launched an Evidence-based
Health Portal*

May 2012

The objective of the Portal is to provide scientific information to healthcare professionals by offering access to publications and clinical protocols by professional peers based on the evidence available from recognized healthcare databases.

Parceria CAPES e MS

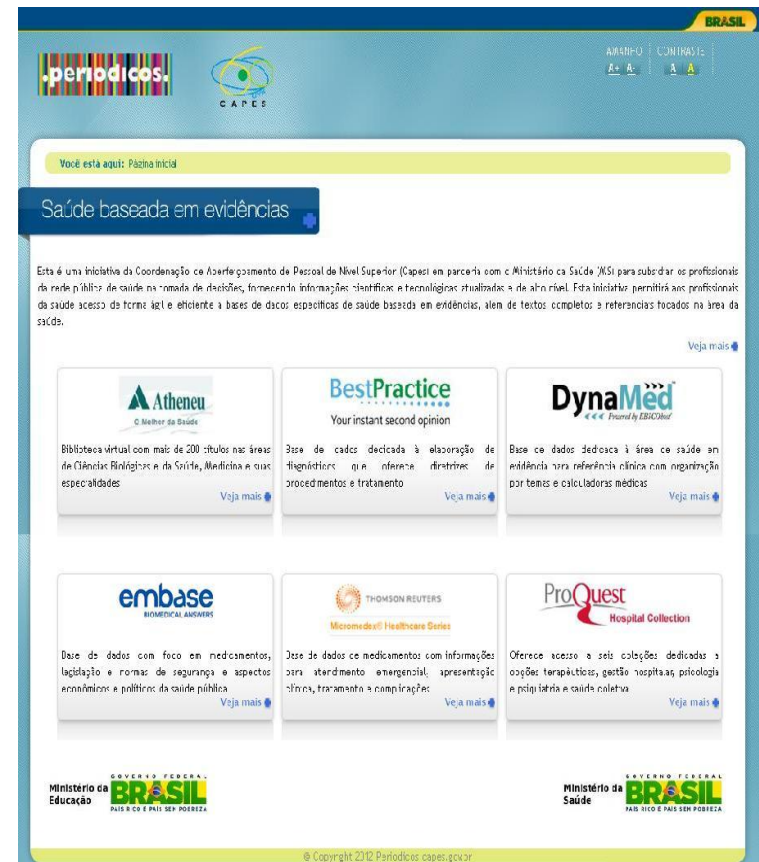

- The portal was developed after a survey of healthcare research communities in order to identify the most suitable databases for satisfying the needs of professionals in the area.*

October 2011 - *Technical Meeting to identify digital database collections focused on evidence-based healthcare.*

Hotsite

10 million reales were invested in the portal and the purchase of seven digital database collections: Rebrats, Embase, the ProQuest Hospital Collection, Atheney Virtual Books, Micromedex, Dynamed and Best Practice – British Medical Journal, and it is estimated that it will benefit 1.8 million professionals.

Evidence-based Health Portal

Who can gain access to the site

Healthcare professionals must be linked to professional consultancy in one of the following fields: biology, biomedicine, physical education, nursing, pharmacy, physiotherapy and occupational therapy, language therapy, medicine, veterinary medicine, nutrition, dentistry, psychology or social services.
